Dear Senator Kyl:

This is in response to your letter to Assistant Secretary Moore regarding a constituent's question on the use of depleted uranium in missiles and bombs in Iraq.

Our review of the constituent's specific question regarding the use of certain munitions in recent operations confirms that none of the guided bombs or cruise missiles that the U.S. used in Iraq and Afghanistan contained uranium of any type.

We appreciate your constituent's concern for the health and well being of our military personnel and those engaged in reconstruction efforts. Thank you for the opportunity to provide a response.

Sincerely,
